JUMBO OVERALLS

We don't like to harp too much on one theme, but "Jumbo" Overalls are so far ahead of any others that we feel we have to again remind you to see that you get the genuine "Jumbo" as there are many inferior imitations. See that the word "Jumbo" and the horseshoe are marked on the overalls.

An Irishman raised up in Drumbo
In Canada grew wheat on gumbo,
Good values he knew,
For he'd sampled a few,
So for overalls always bought "Jumbo."

LITTLE ITEMS OF LOCAL INTEREST

Gottlieb Ohlhauser of Carbon again won the prize for the best decorated car in the opening parade at the Calgary Stampede, this being the second year in succession that Mr. Ohlhauser has carried off the honors in this event.

Wm. Cardiff, manager of the Bank of Toronto at Marwayne and formerly of the Bank of Toronto staff in Carbon, was a visitor in town last week.

Mr. and Mrs. L. Poxon, and Cyril and Wilfred Poxon, motored into Calgary on Wednesday and will spend a couple of days at the Stampede.

Marion and Elaine Torrance are confined to the house with chicken pox.

Miss Lottie Smith leaves tomorrow to spend a couple of weeks holiday with friends in Blairmore.

M. McHardy was a visitor in Carbon on Wednesday.

Frank Seymour is spending the week at the Stampede.

Mr. and Mrs. McLeod of California arrived on Tuesday evening and are visiting with Mr. McLeod's brother, Mr. A. McLeod.

The Misses Edith Braisher and Vera Poxon left on Monday to spend a ten days' holiday at the C.G. I.T. Camp at Sylvan Lake.

You are cordially invited to the services at the United church at the point which is most convenient to you. Garrett at 11 a.m., Gamble at 2 p.m. and Carbon at 7:30 p.m. The services start at the opening hour and will be interesting and helpful. The subject will be "Companionship with God."

Grainger Items

(received too late for last issue)

The Grainger Junior ball team played their first game of the season at home on Sunday evening, when the team from the district south of Carbon was defeated by the locals. The score at the end of the first half of the sixth inning was 19-4.

Rain did not hinder the committee of the Jubilee picnic and the sports that were possible were successfully conducted in the Grainger Hall. There was a good attendance in spite of the weather conditions.

Miss Jean Ennis has resigned her position as teacher at the Simcoe School and is returning to her home in Alix.

Mr. and Mrs. W. J. Gordon returned Monday after their trip East.

General individual travel through the Canadian west is expected to be very heavy this year according to R. G. McNeillie, general passenger agent of the Canadian Pacific Railway at Winnipeg. Several important parties will also add to the number of travellers especially through the Canadian Rockies regions.

The life of John Pope, sailor aboard the American vessel Natirar was saved recently by instructions wirelessly by Surgeon Taylor of the Canadian Pacific steamship Minnedosa, after Pope had been critically injured by a fall of sixty feet from the mast. The two ships were 190 miles apart but hove to later and the injured man was transferred to the C. P. R. ship and rushed to Quebec.

STORM PUTS LONG DISTANCE LINES OUT OF COMMISSION

The storm last Saturday afternoon caused considerable damage and delay in the telephone service between Carbon and district and Calgary. There were 54 poles down between Irricana and Keoma, where a regular tornado hit that part of the country, causing the stations of Acme, Beiseker, Swallow, Irricana, Three Hills and Carbon to have no connection with Calgary except through Carstairs.

School Notes

(Left over from last week)

The Annual Departmental Examinations held in Carbon High School, ended on June 29. The following students wrote in the various Grades:

Grade XII:- Fern Ferguson, Fred Fuller.

Grade XI:- Olive Charlebois, Mary Currie, Willie Edwards, Victor Gordon, Ella Halstead, Hugh MacDonald.

Grade X:- James Bishop, Harold Bramley, Daphne Nash, Annabelle Ramsay, Adeline Stephens, Alfred Wallace.

Grade IX:- Nora Atkinson, Jennie Braden, Edith Braisher, Monica Hodgson, Oliver Pinn, Gordon Ramsay, Caroline Wright, Sydney Wright.

Grade VIII:- May Childs, Margaret Fox, Alice Kaiser, Darrel Kincaid, Tom Johnson, Dorothy Mortimer, Irene Nash, Cyril Poxon, Wilfred Poxon, Mabel Ramsay, Leola Wallace.

The result of the above examinations will be announced about the end of July or first of August. School closed on June 29 and will reopen on Sept. 1st.

The Canadian Pacific Railway Company reports from Winnipeg the marketing of grain at the present rate of 180,000 bushels daily, as compared with 123,376 for the corresponding season of last year. Manitoba's 180,000 compares with Saskatchewan's 533,000 and Alberta's 366,827. Loadings are also above last year's record with 220 cars daily.

The greater portion of the bells forming the carillon to be installed in the Victory Tower, at Ottawa, were shipped from England on May 7 by the Canadian Pacific steamship "Balfour." The carillon, consisting of 53 bells, is regarded as the finest in the world, and have been cast at the famous bell foundry at Croydon. The bells are a portion of a national memorial to thousands of Canadians who laid down their lives in the Great War.

The Province of New Brunswick is rising in importance as a fur-farming province. The report on the fur farms of Canada just issued by the Dominion Bureau of Statistics shows New Brunswick at the head of all the provinces in the matter of the yearly gain in the number of fur farms. These increased by exactly 100 in the year ending March, 1926, nearly doubling the number of the year before and standing in the later year at 206. Prince Edward Island still leads the Dominion in the number of farms, having 570 out of a Dominion total of 2,283, the latter figure comparing with 2,130 the year before. The provinces rank as follows: Prince Edward Island, 570; Ontario 495; Quebec, 456; New Brunswick, 206; Nova Scotia, 192; Alberta and British Columbia, each 120; Manitoba, 53; Saskatchewan, 42, and the Yukon Territories, 20.

SPORTS DAY TO BE HELD ON JULY 20

The date for the Carbon Sports and Water Carnival has been set for Wednesday, July 20th, and a good program has been outlined for the occasion. The same plan as was formerly drawn up will be followed and the committees are leaving nothing undone to make the event a memorable one. The dam in the creek has again been fixed and water will be available for the aquatic sports. One of the main features of the day will be the ball games between teams from Three Hills, Beiseker, Rockyford and Swallow and some real baseball should be in evidence. A first prize of \$65 and a second prize of \$35 is being offered to the winners of this event.

A big dance has been arranged to 'wind-up' the day, and it will be held in the Farmers' Exchange hall. Special music is being provided for this occasion.

POOL BUYS MORE ELEVATORS

Twenty country elevators have been purchased by the Alberta Wheat Pool from the United Grain Company, Ltd., according to an announcement from the offices of the Pool during the past week. These elevators are located at Czar, Carbon, Halkirk, Hughenden, Irricana, Magrath, Big Valley, Bashaw, Byemoor, Elnora, Excel, Meeting Creek, Mecheche, Rumsey, Rowley, Sibbald, Chinook, Youngstown, Cereal and Endiang.

The Alberta Wheat Pool now owns a total of 135 elevators in the province and it is expected that this number will be increased to 150 before the 1927 crop begins to move to market.

The Herald cup play offs for the district golf clubs will commence on the Carbon course next Sunday, when the clubs from Irricana and Rockyford will visit here.

The Carbon course is being put in shape this week and Dick Heath has been given the job of mowing the fairways and oiling and resanding the greens.

An aeroplane passenger and freight service to the central Manitoba mine area was inaugurated on June 1 by the Western Canada Airways, Limited, making the first commercial service to be operated in the Province.

Foundation work is proceeding rapidly on the new addition to the C. P. R. grain elevators at Port McNicoll, which when completed, will have a storage capacity of 6,000,000 bushels, instead of the present capacity of 4,000,000 bushels.

A total of 1,334 English boys have already been moved from the Old Country and placed on farms in Quebec and Eastern Ontario by the British Immigration and Colonization Association according to the figures given out at the annual meeting of that organization.

According to figures of the Canadian Government, Canada led all countries of the world by a wide margin as an exporter of wheat, from August 1 to December 31, 1926. In that period Canada shipped 167,795,000 bushels, her closest rival being the United States with 94,191,000 bushels.

Days of the covered wagon were recalled recently. Mr. and Mrs. W. G. Barker and six children arrived at Biefait Saskatchewan from Parshall, North Dakota, in an outfit consisting of a covered wagon, 19 head of horses and four wagons carrying their household effects and farm implements. They leased a half section of land.

Cuticura Talcum is the Ideal Powder

Its purity, smoothness and fragrance, combined with antiseptic and prophylactic properties, which help to overcome disagreeable odours, make it an essential toilet requisite.

Sample Each Free by Mail. Address: Canadian Depot, "Stoneware," Ltd., Montreal. Price, Soap 25c. Ointment 25c and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Ottawa Should Co-Operate

The Manitoba Court of Appeal has declared ultra vires the Manitoba Sale of Shares Act and the Municipal and Public Utilities Board, insofar as these enactments purport in any way to control the sale of shares in that Province of a Company incorporated under a Dominion charter. This decision follows one by the Supreme Court of Canada which, in effect, decided that when there is a conflict of authority between Provincial and Dominion legislation, the latter prevails.

In other words, all that is necessary for stock promoters to do in order to get around the measures set up by the Provinces to protect their people from being victimized by unscrupulous promoters of doubtful stocks is for them to secure incorporation at Ottawa. Inasmuch as the Ottawa Government has provided no proper check upon the stock selling operations of Dominion incorporated companies, it means that they may do pretty much as they please.

In view of these judgments, and the failure as yet of the Ottawa Government to take action as has been repeatedly urged by the Provinces, it is gratifying to note that Western Provincial Governments are again recommending that this whole subject be placed on the agenda for the Conference to be held at Ottawa this Fall between representatives of the Dominion and the several Provincial Governments. Ottawa is being asked to supplement the legislation of the Provinces by the enactment of legislation regulating the sale of shares and securities of Dominion companies.

The Ottawa Government should be just as keen to protect all the people of Canada as the Governments of the Provinces are to protect their citizens, and it is beyond the comprehension of the average citizen to understand why the Dominion has so consistently refused to do so.

In this year of Canada's Diamond Jubilee the people of Canada are being urged to forget all sectional differences and to emulate the Fathers of Confederation in working untiringly to build up and strengthen the Dominion as a national unit. Any causes of friction between the Federal Government and the Province is a source of national weakness, making for disunion. If any Province feels that Ottawa is not fully seconding their efforts on behalf of their people, the result is to weaken Confederation and that devotion and loyalty to Canada which is so necessary.

In his Dominion Day message to the people of Canada, His Excellency the Governor-General says: "When first I landed on these shores as His Majesty's personal representative, in the first speech I made, I informed my hearers that I should take 'co-operation' as my watchword during my life in this Dominion. That word is the message I give to the people of Canada today. I ask one and all, whatever their origin or race, heartily to co-operate with a common understanding and purpose in all that pertains to the well-being of all; proud of and loyal to their citizenship of a great and growing nation."

Canada could hardly have a better national watchword, and in this matter of regulation of the sale of shares and securities of Dominion companies, it is high time the Ottawa Government reversed its attitude, and, instead of denying the very reasonable requests of the Provinces, proceeded to wholeheartedly co-operate with them in the common interests of all. The Provinces are not asking the Dominion to abrogate any of its powers, but to exercise them in full co-operation with the Provinces, rather than, by neglect, leaving the Provinces at the mercy of all and sundry who, in order to get around legitimate Provincial laws, obtain Dominion incorporation and then defy the Provinces.

This is not co-operation on the part of the Dominion Government. It is not an attitude that tends to create loyalty to Confederation. Persisted in, it will weaken the national tie. Legitimate companies and promoters do not seek to evade Provincial control in this way; it is the doubtful stock-selling proposition and the dishonest promoter who is being assisted because of Ottawa's refusal to join hands with the Provinces in the protection of all the people.

It is to be hoped that the authorities at Ottawa will catch the true spirit of the Diamond Jubilee, put their house in order in this matter, and co-operate with the Provinces.

Artificial Cotton Feasible

Another Useful Product Can be Made From Wood Pulp

Now that Canadians have become quite accustomed to their rayon silk hosiery and underwear, it is time chemistry furnished another startling example of the multiplicity of useful products which can be made from wood pulp. This time it is to be artificial cotton, if the prediction of Dr. Harold Hibbert of McGill University comes true. Speaking at the Chemistry Convention recently he said: "One method by which we can extend the usefulness of our pulp is by substituting it in Canada for cotton in all its forms. This is being attempted by the chemists of the Dominion today and it is feasible. The successful substitutes of wood pulp for cotton would benefit Canada in many ways."

Visitor (at seashore): "I suppose there's no danger in bathing here?"

Old Native: "Don't bless yer, no sir. All ye have to do is to keep away from the sharks an' the strong currents."

Stomach Upset?
Food or water may cause severe abdominal pains, but you can relieve the agony at once with **Chamberlain's Colic & Diarrhoea Remedy**

Pleads For Wider Education

University Leaders Should Tackle Problems of Nations Says Currie

Sir Arthur Currie, president of the National Conference of Canadian Universities, pleads for a wider field of education. He believes that university leaders should tackle the vital problems of the nations. Governments, he says, would resent interference, but they would likely accept the consultative services of the conference.

Sir Arthur touches on a vital question in education. It is, in short, a question which affects the very life of the future university. It is a problem of bridging the gap between the academic and the practical.

A correspondent notes a man in Chicago ran over a girl while driving to a hall where he was to give a lecture on "Public Safety" and suggests that he begin his address to the Judge with: "Unaccustomed as I am to public speaking . . ."

Minard's Liniment for insect bites.

Growth of Calgary

Calgary's population is estimated at 51,880 by the 1927 Henderson's City Directory, a copy of which has been received at the Herald office. The directories census for 1927 shows an increase of 3,900 over that of 1926. The Dominion census of 1926 gives the population of Calgary as 65,513.

Will Discuss World Population

Experts Going Into Subject at Geneva Conference This Summer

Has the world too many people, and, if so, what is to be done about it?

This question will be considered at a World Population Conference at Geneva from Aug. 31 to Sept. 3. It is the first conference of its kind ever to be held and will bring together biological, sociological and statistical authorities who have gone far into the study of the population problem, but who have never assembled at a common meeting table to exchange their views and co-ordinate their knowledge.

An advance notice issued by the Advisory Council says:

"The question of population growth holds possibilities of a menace to the future of civilization, and yet the world population problem is one of the few great issues of today which have not been the subject of concerted international action."

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILINE

"My testimony should convince any one that 'Nerviline' is a splendid preparation to use on swelled joints. Rheumatism left me badly crippled," writes Amos E. McEury, from Kingston. "I went to McKay's Drug Store and they recommended Nerviline, which restored me completely."

For Rheumatic pains, Lumbago, Sciatica, you will get lasting satisfaction from a 25c bottle of Nerviline. Sold everywhere.

To Destroy Icebergs

Montreal Professor to Study Methods of Iceberg Destruction

Dr. Howard Barnes, professor of physics at McGill University, international authority on ice, is now preparing for another trip to Newfoundland to continue his research in the problems of iceberg destruction. He expects to leave with his party in two weeks and will spend several months continuing his work studying particularly the effects of thermite in cracking the icebergs and so making way for weathering effects which lead to their speedy destruction.

This will be the eighth iceberg expedition that Dr. Barnes has organized since 1919. He will be able to take up the work where he left off last summer and expects that the expedition this year will bear particularly fruitful results.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

English Boys Making Good

Brought to Canada for Farm Work Have Proved Satisfactory

A total of 1,234 English boys have been moved from the Old Country and placed on farms in Quebec and Eastern Ontario by the British Immigration and Colonization Association according to the report at the annual meeting. Already this year the association has moved and placed 498 boys, and the total for the year is expected to reach 790. More than 98 1/2 per cent. of the boys have turned out satisfactorily, and more than \$48,000 has been saved by them from their earnings and placed in banks to be turned over to them when the periods of supervision are ended.

For Catarrh. It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions, will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Were Unusually Tall

There are many well-authenticated instances of extraordinary height. Duke John Frederick, of Brunswick, was 8 ft. 5 in.; one of the Prussian Guard was also 8 ft. 6 in. O'Brien, the Irish giant, whose skeleton is in the College of Surgeons, London, is 9 ft. 1 in.

Minard's Liniment for earache.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *Dr. H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Spending Year in Labrador

McMillan Has Taken Snowmobile as Part of Equipment

A snowmobile is part of the equipment which Donald B. MacMillan, Arctic explorer, took with him on his famous schooner Bowdoin when he sailed for a year of scientific study in Labrador. He told something of his plans when in Boston recently to supervise the outfitting of the fishing schooner Radio which he chartered from the Boston Maritime Company as a companion ship to the Bowdoin.

The Radio was loaded with wall-board and other building material which will be used to erect a permanent scientific station near Kowk in Northern Labrador. MacMillan's party numbers 25, of whom 12 will remain with the explorer for studies of the botany, geology and fisheries of the region.

The Bowdoin will carry the scientific equipment and supplies, as well as the snowmobile and dog sleds. The sleds will be driven by Eskimos far into the interior in search of polar bear and walrus.

Besides studying the salmon and trout of Labrador, MacMillan hopes to classify many other fish which he says have long been known but have not been given names by the natives.

Mystery of Science

Hundreds of Live Clams Found 20 Miles From Sea Coast

One of science's choice morsels of mystery is believed to have been uncovered when a bed of hundreds of live clams was found on the side of Scotia's bluff, twenty miles south of Eureka, Cal., and about the same distance inland from the Pacific ocean.

Workmen operating a steam shovel on the Northwestern Pacific railroad, biting with the shovel into the side of the bluff, approximately 129 feet above sea level and some eighty feet above the Red river, directly below, traced a path through the biwalvean colony.

Those making the discovery said the clams did not resemble the fresh-water variety, but were similar to the Tazor clams of salt water.

Time has Tested it. Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Juvenile Immigration

Over 80,000 Children Brought to Canada by Various Societies

The annual report for 1925-26 of G. Bogue Smart, Supervisor of Juvenile Immigration, in the Department of Immigration and Colonization, shows that since the year 1868 the number of children sent to Canada by various philanthropic agencies or societies, is 83,888. Of these 26,555 have come from the Dr. Barnardo Homes, while two other agencies that have brought 14,578 and 5,529 juveniles respectively, have now amalgamated with the Barnardo Institution. For the year ending March 31st 1926, 1,862 children—1,590 boys and 272 girls—were brought out to Canada.

A school in Oklahoma City last fall offered to accept cotton in payment of tuition and about 200 students took advantage of the opportunity.

Alberta Wheat Pool Elevators

By harvesting time the Alberta Wheat Pool will have 112 elevators in operation. It started into the elevator business last year with 12 interior and the Prince Rupert terminal elevator. It has bought a site for a big terminal elevator at Vancouver, and will build 100 in Alberta this season to supplement the 42 acquired last year.

GAINED IN HEALTH AND IN WEIGHT

Now Gives All the Credit to Dr. Williams' Pink Pills

When a young girl becomes pale, complaining of exhaustion at the least exertion, has dizzy spells, headaches or stomach trouble, she should know that these are some of the many symptoms of anemia, which means that her blood is thin and weak. In such conditions there is the most urgent need for a tonic that will promptly restore the missing qualities to the blood and thus bring back health and strength. For this purpose there is no tonic can equal Dr. Williams' Pink Pills. Thousands of weak and ailing girls have found new health and happiness through this medicine. Miss Gladys V. Bond, Kentville, N.S., used this treatment successfully, and says: "I cannot praise Dr. Williams' Pink Pills too highly for the good they have done me. I was in a condition of very poor health, suffered from severe headaches and nervousness. My appetite was poor, and very little exertion would leave me tired out. On the advice of a friend I decided to try Dr. Williams' Pink Pills. In a few weeks I began to feel better, my appetite improved, and the headaches were less frequent. I continued the use of the pills until I had taken six boxes, by which time I felt as well as ever, and I gained in weight from 98 pounds to 114 pounds. For this reason I advise all weak girls to try this medicine."

"Try Dr. Williams' Pink Pills for anemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

American Settlers Coming

Seven Illinois farm prospects passed through Winnipeg the other day on their way to North Saskatchewan and Alberta, looking for likely districts to settle in. They came from Chicago with C. J. Broughton, Canadian Government agent at Chicago, and left with him on the Trans-Canada Limited. Large motor parties of farmers are due in Western Canada this summer, according to Mr. Broughton.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Teacher: "What excuse have you for being so late?"

Johnny (breathlessly): "I ran so fast, teacher, that I didn't have time to think one up."

Asthma.

Spread Minard's on brown paper and apply to the throat. Also inhale. Quick relief assured.

MINARD'S "KING OF PAIN" LINIMENT

WORTH OF LAUGHTER

Even the feather-brained people do not laugh at inopportune moments. Real laughter is never inopportune. There is "the loud guffaw that bespeak the vacant mind," to be sure, and there is the titter and the smirk. But the good, honest laugh is one of God's best gifts to men. Pity 'tis not more often used. It is always timely. One of the great bane of our existence is taking ourselves too seriously. How often this spirit of over-seriousness besets the Canadian political campaigns. Most of us, as we look back on experiences of the kind through which we have come now realize that we would have preserved a more helpful, truer average if we had gone over to the enemy's camp now and then and laughed with them.

Dictionaries of quotations do not record who first said, "A little non sense now and then, is relished by the best of men." Whoever the sage was who first said this, probably did not refer so much to that sheer nonsense, indicative of the vacant mind, as he did to that safety valve for too tense emotion.

In recent days we take it that the boyish Mr. Lundbergh has experienced more sense of honest laughter than he has of pride and exultation. He has seemed to laugh not alone at adulation, but he has seemed to laugh at him-self. What a lesson for most of us with over-swollen conceit concerning our work, our fortunes or ourselves.

—Cranbrook Courier.

First Girl: I've a good notion to chuck cocktails, stop smoking, wear longer skirts, grow my hair and stay at home to help mother.

Second Girl: Heaven only knows where this craze for originality will lead you.

She (inspecting the engagement ring he had just given her): It's very much like the last one I had.

He: That's what the last girl I gave it to said.

You see I've just been married, said the clerk to the store proprietor and I'd like for you to raise my pay. I'm sorry, said the Calgary boss, but I ain't responsible for accidents out of working hours.

J. W.: What shall I do to keep from falling in love?
R. P.: Try pricing apartments.

Canadians hold the record for eating eggs. The average Canadian last year consumed 337—a record according to Dr. J. H. Gridale, Deputy Minister of Agriculture.

Tobacco-growing is flourishing in Western Ontario, and this year the average will likely run to 45,000 or double that devoted to the production of this plant in 1925. The crop last year was valued at \$6,000,000.

One of the most powerful radio stations in Canada will be erected at Red Deer, Alberta, in the near future. Stations will be operated in Calgary and Edmonton by remote control to the main station.

New Zealand will be officially represented at the World's Poultry Congress at Ottawa, July 27 to August 4. R. W. Hawke, one of the Island Dominion's best known poultry breeders, will represent that country.

Besides the game fish hatchery which will be established by the Dominion Government in the Waterton Lakes district in Southern Alberta, a commercial fish hatchery will be established in the north. The latter will also handle certain species of game fish suitable to lake waters.

The Canadian Pacific steamship passenger traffic through the port of Saint John during the winter season of 1926-7 was over 40 per cent. greater than that of the previous season, and it is expected that the summer traffic through the St. Lawrence port will show a still greater increase.

The last addition to the chain of Canadian Pacific hotels is the "Hotel Saskatchewan," located at Regina, opening on May 24. It is one of the finest of the chain of a character in keeping with the importance of the capital city of the Province which furnishes 50 per cent. of the Dominion's wheat output. The hotel is 12 stories, containing 216 bedrooms with bath, and many beautiful public rooms and administrative offices.

APPLESAUCE

A Calgary bride asked her husband to tune in and copy off a radio recipe she wanted.

He did his best, but he got two stations at once, one broadcasting the morning exercises and the other the recipe.

This is what he took down:

Hands on hips, place one cup of flour on the shoulders, raise knees and depress toes and mix thoroughly in one-half cup of milk. Repeat six times. Inhale quickly one-half teaspoon baking powder, lower the legs and mash two hard boiled eggs. Exhale, breathe naturally and sift

into a bowl.

Attention! Lie flat on the floor and roll the white of an egg backwards and forward until it comes to a boil. In ten minutes remove from the fire and rub smartly with a rough towel.

Breathe naturally, dress in warm flannel and serve with fish soup.

Raise Larger Crops and Make More Money

Plow 5 to 8 acres daily

Double disc 15 to 25 acres daily

Seed 25 to 40 acres daily

In crop production the Fordson farmer's advantages are sevenfold:

- First** —He prepares an ideal seed bed. Fordson speed and power allow thorough use of plow, disc, cultivator and harrow producing a splendid state of tilth in which young plants thrive heartily.
- Second** —He prepares as much land for field crops as he had planned.
- Third** —He gets his seeding done on time.
- Fourth** —He accomplishes the work with greater ease and convenience.
- Fifth** —He receives a larger yield from timely work well done.
- Sixth** —His cost is much lower because one man can do two or three times as much work.
- Seventh** —He makes more money.

In addition the Fordson farmer has ample power for such belt jobs as threshing, filling silos, baling hay, grinding grain, sawing wood, and many others.

Over 17,000 Fordson farmers in Canada enjoy these advantages.

WORLD HAPPENINGS BRIEFLY TOLD

The will of Sir Wm. Mackenzie, former president of the Canadian Northern Railway, Toronto, who died on December 5, 1923, has been probated in London. Sir William left an English estate valued at £17,000.

Dr. Julio Brava, special medical health officer of Madrid, Spain, after nine months' study of disease prevention and control methods in American cities, is visiting Canada to pursue similar investigations.

A man born in England and a resident for fifty years of the United States, has contributed \$1,750 worth of bonds toward reduction of the British debt to the United States. This is his fourth donation.

The Soviet Military and Naval Court at Kronstadt condemned to death Commander Klepikoff, an officer in the Baltic fleet, who was accused of espionage in behalf of Great Britain.

Colonel Charles Lindbergh has been invited by the Canadian National Exhibition to visit Canada as the guest of the exhibition, which officials state they expect will be opened by the Prince of Wales on August 27 next.

Many of the red cedar totem poles that now stand as sentinels of the past at half-deserted Indian villages along the British Columbia coast are more than four centuries old, in the opinion of the Capilano Timber Company.

Following on the visit of the British government director of airship development, accompanied by air ministry experts, the Union government has decided to authorize the immediate placing of contracts for erection in South Africa of a mooring tower for airships.

The burden of responsibility for accidents occurring at unprotected railway crossings rests with the motorists, according to the tenor of three judgments rendered by Mr. Justice Denison, of the Superior Court, Montreal, who dismissed three actions instituted against the Canadian Pacific Railway by relatives of three victims of an accident at Mastinong.

Recommend Liver Diet

Believed to Have Beneficial Effect in Case of Anemia

Liver diet as a treatment for anemia was discussed by the Canadian and Ontario Medical Association in convention at Toronto.

Dr. F. J. Campbell, of London, Ontario, read a paper which concluded that the feeding of liver, whether from beef, calves, sheep, or pigs, has been proved very successful in combating pernicious anemia. He pointed out that as the duration of this disease is from five to ten years, it was too early to say that liver feeding was a cure. Results, however, after one year's experiment, were very promising.

Saskatchewan Livestock Pool

A total of 3,750 contracts covering 1,565 carloads of livestock to be marketed during the year, beginning June 1, when the Saskatchewan Livestock Pool started operation, have been received at the Pool headquarters to date.

China's Population Decreasing

Due to Abnormally High Death Rate Says Statistician

China, with its swarming millions of people, its crowded streets and villages, has a very low rate of population increase in recent years, largely because of the great proportion of death. This fact is shown by a new study of Chinese censuses since 1741, made by a Chinese Government statistician named Changhen Chen.

In 1741 the Chinese people numbered only about 25,000,000 more than the United States population of today, and in the fifty years following 1741, the population more than doubled, advancing at the rate of 15 to the 1,000 people every year. In the next half century the population increase slowed down to less than five additions a year to each 1,000 people. From 1819 down to 1923 the rate of addition has gone down to only .81 a thousand. This, Mr. Chang says, is lower than the rate of population advance in any other country except France.

"The rate of increase of nations of the white race since 1800 has been 1.1 a 1,000," he says. "This means that the rate of increase of the Chinese population in modern times has been not quite one third as fast as that of other countries."

The Chinese population reached the 400,000,000 mark back in 1925, according to the census figures. Since that time it has advanced only to 528,370,000, and the statistician believes that this extraordinarily slow rate of advance is due to high death rates rather than to low birth rates. China does not need any large increase of population at present, he adds, but high death rates are not healthy factors.

Winnipeg Newspaper Union

A Modish New Frock

Of girlish simplicity is the attractive frock shown here. The two-piece skirt is skirted to the bodice having a round neck and gathers at the front of each shoulder. View B has a short kimono sleeves and View A has long sleeves skirted to the short ones and gathered at the lower edge into wristbands. A side bow is placed at the left shoulder and a wide girdle is crushed into a buckle at the front. No. 1588 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust), requires 2 1/4 yards 39 inch material, or 2 1/2 yards 51 inch; 1/2 yard less 39 inch material is required for dress with short sleeves. Price 20 cents the pattern.

House sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make with our difficult an attractive dress. Price of the book 10 cents the copy.

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. If it is in paper that is probably the reason. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

How to Avoid Cancer

That celebrated British surgeon and cancer authority, Dr. Robert Bell, M.D., F.R.C.P.S., &c., voluntarily sacrificed his highly lucrative surgical practice when, after long years of exhaustive research and practical experience, he nobly published the following statement of vital import to the cancer-stricken civilized world:—"Cancer is a blood disease and its breeding ground is the colon. Neither X-ray nor radium has ever cured or will ever prove of service as a cure for cancer. From my knowledge of the disease I affirm that the knife has never cured cancer in a single instance; but, on the contrary, has only succeeded in aggravating the disease and adding to the sufferings of the poor patient."

Countless thankful patients living today mourn the passing in 1926 of the author of the above quoted words and if Dr. Robert Bell's profoundly considered warning is now needed, it is possible for the public to render the devastating Cancer Scourge a mere matter of history.

Civilization's diet is responsible for depriving the public of the abundantly provided organic salts essential to health preservation and the substitution of what have been truly described as "foodless foods" which create a superabundance of acids in the human body, resulting in the now practically universal complaint of constipation that is the inevitable forerunner of Cancer and also of ninety per centum of all civilization's physical maladies.

The active ingredients contained in pills, purgatives and laxatives, combined with their only partial relief, caused Dr. Robert Bell to soundly condemn their use as being injurious and dangerous. The method of curing constipation without drugs is disclosed in the last book presented to the writer by Dr. Bell, whose advice is quoted in the writer's copyright dietary which is mailed without charge to every Canadian and American purchaser of the English home Cancer Treatment. Detailed information concerning this treatment is also freely mailed on application to Charles Walter at 51 Brunswick Avenue, Toronto 1, Ontario, Canada.

An Ancient Custom

Ostracism was a method employed by the ancient Athenians of banishing citizens whose influence was considered prejudicial to the state. A day for voting was fixed when the people wrote on small earthen tablets or shells the names of those whom they wished banished. Six thousand votes were necessary to drive a man into exile. To ostracise today means to ignore, to exclude from a certain social circle.

SUNDAY SCHOOL LESSON

JULY 3

SAUL CHOSEN KING

Golden Text: "What doth Jehovah require of thee, but to do justly, and to love kindness, and to walk humbly with thy God?"—Micah 6.8.

Lesson: 1 Samuel, Chapters 9-11.

Devotional Reading: Psalm 119.1-8.

Explanations and Comments

1. Samuel's Reminder of God's Goodness, 10.17-19. — The prophet Samuel called the people together at Mizpah and reminded them that God had delivered them as a people in former days from the oppression of the Egyptians and of other kingdoms, and now they were rejecting God in demanding a king.

"Forget not all the sunshine of the way
By which the Lord hath led thee."
—E. R. Havergal.

"Now therefore present yourselves before Jehovah by your tribes, and by your thousands," was the conclusion of Samuel's speech. "A wise man has said that to make the best of things in the right way is to let things make the best of us. This is what Samuel did. He made the best of this crisis in national affairs in the right way by nobly doing all he could to carry out what must be, although he did not like it, and thereby he brought out the best that was in him—magnanimity, generosity, greatness of spirit that rises above all that is envious and revengeful and petty."

It is one thing to submit to the inevitable because we must; it is quite another thing to submit graciously and let the inevitable make the best of us.

II. The Selection of a King, 10.20-24.—Samuel conducted the selection of a king by lot as if in the very presence of the Lord. Important matters were often decided by lot in Old Testament times. In Proverbs 16.33, we are told that

The lot is cast into the lap;
But the whole disposing thereof
Is of Jehovah.

It is thought that the "lap" here stands for the "basin" of an urn or vase. The scapegoat was chosen by lot (Lev. 16.8); the location of the several tribes in Canaan was settled by lot (Num. 33.54); the trespass of Achan was discovered by lot (Josh. 8.14-21).

First, the tribe of Benjamin was "taken" that is, chosen by lot, from among all the tribes; then the family of the Matrites from among all the families or clans (thousands); then the house of Kish, and at last Saul himself. When they looked for Saul he had disappeared. The people then sought to know God's will either through Samuel the prophet, or by means of the Urim and Thummim on the breastplate of the high priest's ephod; see Exodus 28.30; Num. 27.21; 1 Sam. 28.6. The answer came: "Behold, he hath hid himself among the baggage." They found Saul and brought him forth, and when it was seen that he was a head taller than all the rest, they thought this fitting in one who was to be their king. "See ye him whom Jehovah hath chosen, that there is none like him among all the people?" asked Samuel.

Mennonites for Peace River

Representatives of the Mennonite colony in Manitoba recently left for Peace River to investigate the desirability of homesteading in that district. If present plans are put into effect about 25,000 of these people are expected to move into the Peace River country.

CANADA'S BISLEY TEAM

Members of the 1927 Canadian Bisley team who sailed for England on June 10th, on the Cunard liner Ausonia. Seated are: Brig. Gen. G. Duff Stuart, commandant of the team, of Vancouver, on the left, and his adjutant, Major J. F. McManus, of Belleville, Ontario. Standing in the first row from left to right are: Sgt. W. H. Wood, P.P.C.I.L.; Sgt. B. W. Beaumont, of Victoria; Pte. Potter,

Pte. J. H. Houlden, of Hamilton; Sgt. Bunnell, of Sussex, N.B.; Cadet L. J. McAvoy, of St. John, N.B.; C.Q.M.S. A. Parnell, of Verdun; Lt. J. E. Foreman, M.C. Second row: G. H. Gray, Sgt. F. S. Glass, Sgt. McCabe, Cpl. Douglas, C.G.G.; Pte. R. C. Stock, R.C., Toronto; Sgt. G. M. Emslie, M.M. Back Row: Lt. Kr. MacGregor, Ottawa; C.S.M., H. A. Hawkins, of Toronto; and Lt. D. T. Burke, Ottawa.

CANCER

Great Success of Cantassium Treatment

A well-known London surgeon and recognized authority on cancer has created world-wide interest in the discovery that cancer is due to a deficiency of potassium "salts" in the body, which causes the cells to break down and become malignant.

In order that every one may learn

The Real Cause of Cancer

A remarkable book has been specially written.

This book will be sent free to patients or any one who is interested in the most successful method of fighting "THE CANCER SCOURGE."

The following is a list of the chapters:

1. The Limitations of Surgery; 2. Some Doctors Oppose Operation; 3. What Cancer Is; 4. Why the BODY CHANGES; 5. HOW TO PREVENT IT; 6. Common Errors in Diet; 7. Vital Elements of Food; 8. Medical Endorsements of our Finding; 9. The Chief Minerals of the Body; 10. The Thyroid Gland; 11. Age When Life Begins to Accumulate; 12. Potassium Causes Life Extension; 13. Great Value of Potassium; 14. Parts of the Body Liable to Cancer; 15. Parts Which Are Seldom Affected; 16. How a Doctor Can Help; 17. How to Avoid Cancer; 18. Death-rate From Cancer; 19. Arterial Sclerosis and Old Age; 20. Rheumatism, Gout and Kindred Complaints.

With this book are a number of interesting case-reports proving the great value of "Cantassium Treatment" in various cases. The treatment is simple and inexpensive, and can be easily taken in one's own home. Apply for free book to Charles Walter, 51 Brunswick Avenue, Toronto, Ontario, Canada.

Wanted Stained Glass Windows

Natives of India Raised Money to Beautify Church

In the centre of a Christian settlement in the jungle at Medak, Hyderabad, India, stands a Christian church of the proportions of a cathedral. This is the central place of worship for the great community of Indian Christians, numbering over 50,000, who have gathered around the Rev. C. W. Fossett, a Wesleyan missionary, as a result of his thirty years' work in this native state. The church was opened a year ago, but there seemed something lacking in its beautiful interior, despite the marbles and many tinted tiles. There was no stained glass in the windows. Six thousand Indian Christians, most of them former outcasts, have given the money for a window, designed by Frank O. Salisbury, a well-known British artist. The subject is the Ascension, and Mr. Salisbury says of the window: "The desire of the donors was that their Church should be as beautiful as any Mohammedan mosque or Hindu temple, and I trust that my work will help them to realize their ideal of beauty as an aid to worship."

Canadians Coming Back

Trend of Travel to U.S. Has Been Reversed This Year

No less than 75 moving vans conveying the household effects of returning Canadians have entered at the Port of Rock Island during the present season, according to a customs official who stated that there had been reversal of the trend of travel from last year. In recent years, he said, the early summer months would see from 50 to 60 of such vans moving south, but this year the movement is northward. Enquiries showed that many of the returning Canadians are going back to the farms which they left.

Constructing Large Elevator

New Building at Port Arthur for U.G.C. of Canada

Work has begun on the construction of a 5,500,000 bushel elevator for the United Grain Growers of Canada at a cost of \$2,000,000, and is to be completed by February, 1928. This elevator will be the largest single working elevator constructed in one unit in the world. The building will measure 600 feet by 1,300 feet. It will be an all-concrete structure with 500 concrete storage tanks. Adjoining it will be a dock 1,000 feet long.

Produce Films in Canada

Britain's film quota law is having the effect of impelling producing companies of the United States to seek locations in Canada. Several have sent representatives to Calgary and Vancouver to look over the situation and select prospective sites for studios.

MORE HARMONY IS IN EVIDENCE AT GENEVA MEET

Geneva. — Conciliation is taking shape among the divergences of the powers studying naval disarmament here. Great Britain's desire to reopen affairs arranged at the Washington conference may be partially appeased by a proposal from the United States delegation to adopt a resolution agreeing that any arrangement made at Geneva will not prejudice the agenda of the second Washington conference to be held in 1921.

There emerged from a discussion between Hugh Gibson, head of the United States delegation, and Admiral Saito of Japan, the possibility that the Japanese sensitiveness on the point of inferiority in cruiser strength might be soothed by a proposition to make the relative strengths of the United States and Japan 5-3-4 rather than 5-3.

Indications are that the Americans expect no insuperable difficulties in establishing the proportion.

In the British-American matter of reopening the affairs of the Washington conference, it is pointed out that by the very terms of the Washington treaty the nations must convene to determine whether the developments of science justify any modification of the Washington decisions as to the size of battleships, cruisers and aircraft-carriers. This incidentally would bear on the recent trans-Atlantic flights of Lindbergh and Chamberlin, which have raised the question whether aircraft-carriers should not be increased in size and number to meet the rapidly developing speed of inter-continental air communication.

If the Japanese plan were accepted, it would give Great Britain a considerable higher percentage of war-craft than the United States, and some way must be found in juggling all three plans to establish parity, on paper at least, between the two Anglo-Saxon nations, leaving the United States people to decide whether they wish to build up to the treaty declared parity.

Suffragists Hold Dinner

Celebrate Twentieth Anniversary of First One Imprisoned in London

London. — Twenty years ago June 21 the first suffragists saw the inside of Holloway Jail. This was Miss Billington, now Mrs. Billington Greig, who had emphasized her opinions on the women of Great Britain being deprived of the right to vote by creating a disturbance outside of the residence of Sir Henry Campbell-Bannerman, then premier.

Mrs. Billington Greig, with some thirty women of the suffragist movement of that time, celebrated the twentieth anniversary of her imprisonment by a dinner.

Mrs. Emmeline Pankhurst and her daughter Christabel who were amongst the earliest sufferers of imprisonment in connection with the British women's movement for suffrage, were not represented. Nevertheless, the gathering included some interesting personalities.

Edmonton Boy Soloist

Edmonton. — Believed to be the first time that a Canadian boy has been chosen King's Chorister, Robert Henry Palmer, boy soloist of Holy Trinity Church and son of Col. R. Palmer, D.S.O., former commander of the 49th overseas battalion, has accepted the position of probation choir boy in St. George's Chapel, Windsor Castle, England. The offer came through Dr. Fellowes, who accompanied the Westminster choir on their Canadian tour a few months ago and heard Master Palmer sing here.

Ruined By Earthquake

London. — An earthquake on May 23 ruined the greater part of Lianghow. In the northern part of Kiangsu province near the Mongolian border, it is reported in despatches from Shanghai. A message received by the Daily Mail says the chief magistrate and many others were killed and that all the towers of the city gates and two pagodas, 2,000 years old, were demolished.

W. N. U. 1687

Judges Are Criticized

Importance of Co-operation Between Police Officers and Magistrates is Stressed

Vancouver. — Criticism of supreme and county court judges who quashed important convictions on technicalities of law without due consideration of the seriousness of the crime involved was made by Police Magistrate H. C. Shaw before the opening session of the 23rd annual convention of the Chief Constables' Association of Canada here recently.

In stressing the importance of co-operation of police officers with judges and magistrates, he declared it should be greatest with the latter, who deal with crime and not laws.

Advocates of elimination of municipal and political influence in police forces was made in the report of Assistant Inspector William Wallace, Toronto, secretary-treasurer of the association.

"I know of no change in our provincial statutes so urgent as the adoption of a law that will remove police department from political and municipal influences and interferences, and place them under the control of a responsible and independent police commission," he said.

The Empire Educational Conference

Delegates Are Welcomed With Cordial Speech by Prince of Wales

London. — The Prince of Wales opened the Empire education conference in the board of education's offices with a brief, cordial speech of welcome. Later he chatted with the delegates and shook hands with each.

The proceedings were private, but the official report issued at the close reports the speech of Dr. F. W. Marchant, chief director of the department of education of Ontario.

Dr. Marchant declared the introduction of a more practical element into the primary course made children more interested, improved the attendance and led to the raising of the school-leaving age to 16 years. A greater flow into secondary or post-primary schools also was stimulated. It was now agreed that close co-operation between the school and employer was needed to prepare pupils for trade, he pointed out.

Filling Russia's Order For Canadian Horses

First Shipment Will Be Entirely From British Columbia

Ottawa. — The first shipment of Russia's order for 4,000 Canadian horses will leave Quebec about July 15, it was announced in the department of agriculture.

These horses, numbering approximately 1,300 will all be from the province of British Columbia. The remainder part of the order will be filled by the purchase of horses in Manitoba, Saskatchewan and Alberta. The average price of the whole order of 4,000 head will be, it is estimated, around \$20 each.

Visible to Naked Eye

Minneapolis, Minn. — Pons-Winnecke, the comet without a tail, came within 3,000,000 miles of the earth June 21st, and was visible to the naked eye. The earth, according to Prof. William O. Beale, of the University of Minnesota, drew the comet from its course for a short time, but the greater magnetic forces of the sun drew Pons-Winnecke back to its regular path.

Trophy Comes West

Montreal. — Transcona won the annual system fire brigade competition organized by the insurance department of the Canadian National Railways and the trophy will go West for the first time and repose in Winnipeg for at least one year. Second place went to the Battle Creek, Mich., team; London, Ont., came third and Montreal, N.B., fourth.

Wing 489 Mile Marathon

Grants Pass, Oregon. — Mad Bull, Karlek Indian runner finished the 180 mile Redwood Highway marathon here in miles ahead of Flying Cloud, his nearest rival and 30 miles ahead of Melka, a Zuni, the third runner. He wins a prize of \$1,000.

Wires Assistance

Directing the treatment of a critically injured sailor 150 miles away by wireless and thereby saving the man's life has been the experience of Surgeon Taylor of the Canadian Pacific steamship Minnedosa, photographed above. On May 29 a wireless was received that John Pome, a sailor of the American vessel Nantux was badly injured by a fall sixty feet from the cross trees of the mast. The two ships were nearly 200 miles apart but the course of the Minnedosa was altered and they have to towards the end of the day. The injured man was transferred to the Minnedosa's hospital and aboard that ship was rushed to a Quebec hospital. The accident took place in mid-Atlantic.

STAMP TAX ON CIGARETTES WILL REMAIN IN FORCE

Ottawa. — The cigarette stamp tax reduction application to the tariff advisory board stands adjourned until next fall.

W. H. Moore, chairman of the board, stated that a date for the further hearing of this matter would be named as soon as possible. The applicants, the Imperial Tobacco Company Ltd., Montreal, then would likely be asked to submit whatever further evidence the board desired in support of the company's request for a reduction in the stamp tax from \$6 to \$3 per thousand.

A lengthy session was largely concerned in the evidence of witnesses in respect to the smuggling of cigarettes from the United States into Canada, estimated by David A. Pearson, president of the company to amount to 600,000,000 annually.

J. Murphy, tobaccoist, Windsor, Ont., said about 12,000,000 cigarettes were brought across the line at the Border Cities each year.

A. Auger, private detective, Montreal, declared the amount of duty charged by customs officers at different points of entry in Canada varied in the same quality of cigarettes. In one store in Detroit he had seen nearly 54 Canadians enter within 30 minutes to purchase cigarettes to bring back to the Dominion.

Crop Prospects Good

Vancouver. — Prospects point to a good crop throughout the prairies this year, stated Leslie H. Boyd, chairman of the Board of Grain Commissioners for Canada, on his arrival here.

C.P.R.'s New Mountain Car

One of the first photographs of the new type of mountain observation car being used successfully this season by the Canadian Pacific Railway Company. The car is seen attached to the rear of the Trans-Canada, the crack summer trans-continental of the C.P.R., just as it is about to lose itself behind the lofty peaks that surround the mountain resort of Banff.

Have Justified Claim For Self-Government

People of Irish Free State Are Prosperous

Chicago, Ills. — Hon. Timothy A. Smiddy, Irish Free State Minister to Washington, speaking before the Norman Wail Harris Memorial Institute of the University of Chicago, declared that "the people of the Irish Free State have already amply justified their claims to be allowed to govern themselves."

Prof. Smiddy traced the progress of Southern Ireland since her recognition as a separate nation within the British Empire. A constitution had been written and the foundations for a prosperous business life had been laid. Economic prosperity had followed political freedom and "the more this freedom is an established fact the more absolute equality of the status of the Irish Free State with that of Great Britain herself and of the other Dominions manifests itself in the ordering of her own life, the greater will be the moral bonds which bind her to her associates in the British Commonwealth of nations."

"The more this absolute equality is realized in fact the greater will become our friendship for Great Britain; the greater will be solidarity of the British Commonwealth through contentment among the people of the Irish Free State and their kith and kin."

Will Attend Soviet School in Russia

Children of British Reds Sail for Moscow Without Passports

London. — The Daily Mail says that six children of British Communists have left London for Leningrad aboard the Soviet steamer Youshar, notwithstanding the Home Secretary's refusal to grant them passports. Five boys about 12 years of age, and a girl of the same age, are voyaging to Russia in response to the invitation of Moscow, apparently for purposes of education.

Moscow's invitation was announced on May 13 and after a discussion in the papers it was stated on June 13 that the Government had decided to refuse passports, thus establishing a precedent, as heretofore passports have not been refused unless the applicant had been convicted of a crime.

The next step was a declaration by A. J. Cook, secretary of the Miners' Federation of Great Britain, that a way would be found to send the children despite the Government. This seems to have been done.

Western Pioneer Dead

Sheriff Peter Gunn of Edmonton Had Varied Career

Edmonton. — Sheriff Peter Gunn, of the judicial ridings of Athabasca and Peace River, who came to Alberta 14 years ago, from Scotland, to enter the employ of the Hudson's Bay Company, died June 21, at the age of 63 years. The life of this pioneer was a varied one, as he acted as Hudson's Bay factor, farmer, and Dominion fishery inspector, and also represented the provincial riding of Lac Ste. Anne for eight years, in the Alberta Legislature. He was appointed sheriff in 1916. In politics he was a Liberal.

BRITISH LABOR IS OPPOSED TO SOVIET SLAYINGS

London. — The fervent hope that executions in Soviet Russia such as those of the recent 20 alleged counter-revolutionists will cease was voiced in a resolution adopted at a joint meeting of the executive committee of the Labor Party and of the general council of the Trades Union Congress.

"While recognizing the Soviet Government's indignation at the murder of M. Volkoft (Soviet minister at Warsaw)," the resolution said, "we are obliged to protest against the execution of persons innocent thereof as a reprisal."

The conference also adopted a resolution expressing "uncompromising opposition to the Government's proposals for the so-called reform of the House of Lords."

"We are of the opinion that the House of Commons should be the supreme authority in legislation in finance and that the hereditary upper chamber should be abolished," the resolution said.

Would Purchase Paper Mills

Race Between Canadian and U.S. Companies to Secure Plant in Newfoundland

St. John, Nfld. — A race between Canadian and United States interests to obtain a foothold in the Newfoundland pulp and paper industry developed when a large Canadian corporation notified the Government that it desired to purchase the paper mills at Corner Brook on the West Coast.

The International Paper Company of New York already was negotiating for this property.

The name of the Canadian company was not divulged but it was said the terms offered were considerably more favorable from the point of view of the Government than those of the International. The great plant at Corner Brook was built by Newfoundland and British capital, the two governments guaranteeing the bonds of the enterprise. Recently the company operating the mills asked the government for permission to sell to the International at the same time asking for certain concessions for the latter corporation.

Changes King's Title

Royal Proclamation Has Been Received at Ottawa

Ottawa. — Official copy of the royal proclamation recently issued from Buckingham palace, changing the title of His Majesty the King, was received by the department of secretary of state.

The new title of His Majesty, which was approved at the Imperial Conference last fall, so as to accord with the altered state of affairs arising from the establishment of the Irish Free State as a dominion, is: "George V., by the grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India."

Opens War on Speeders

Quebec. — Relentless war against automobile speeders and summary suspension of the licenses of those caught exceeding the speed limit of the law is the ultimatum laid down by Hon. J. L. Perron, Minister of Highways for Quebec. "Auto riding has become the great summer sport," said Mr. Perron, "but unfortunately the pedestrian can hardly venture on our highways without danger to life and limb."

Another Distance Flight Planned

Prague, Czechoslovakia. — Two Czechoslovak airmen, Captain Frant. Malkevsky, and Lieut. Ludwig Pyllosky have announced their intention to fly from Prague to New York and return in August. Their plane and its motors will be of Czechoslovakian manufacture.

Beer in Ontario

Toronto. — The Ontario Liquor Control Board announced that it would allow the sale of beer by the keg and that there would be a reduction in prices. According to the announcement, buyers also will be able to purchase beer direct from the breweries.

How Education and Training Helps the Farmer to Meet Highest Measure of Success

Even at this late day farmers are still to be found, here and there, who ridicule the idea that college courses in agriculture, or higher education in general, can benefit the farming industry. They decry the investigation of scientific methods and the application of these to farming questions and problems. But, exact altogether from the fact that higher education opens the door to intellectual enjoyments invaluable to every individual man and woman, it is worth while examining the situation from the lower standpoint of dollars and cents. President Glenn Frank, of the University of Wisconsin, who has been investigating the matter, asks whether it pays the boy who wants to be a farmer to go to school, and presents various facts he has unearthed that arrest attention. He mentions that no less than twelve agricultural states in the Republic have made surveys for the purpose of tracing just what effect common school, high school and college training has upon the earning capacity of the farmer.

In Texas it was discovered that an uneducated farmer might earn \$29,000 in forty years, while a farmer who spent twelve of the forty years in school might earn \$49,000 in the same period. That is to say, the farmer who spent twelve years in school will earn \$20,000 more in forty years than the farmer who never went to school. In the twelve years the Texas lad will have spent 2,160 days in school. These 2,160 days in school will net him \$20,000 by the end of forty years, or an average of about \$9.25 a day for every day spent in school. Not bad wages! President Frank comments.

In Georgia it was discovered that the annual net profit of the uneducated farmer is about \$240, while the annual net profit of the farmer with a common school education is \$665.50; the annual net profit of the farmer with a high school education is \$681.50, while the annual net profit of the farmer who has completed an agricultural college course is \$1,354.

Wisconsin's experience showed that farmers with a high school education acquired the ownership of their farms in about seven years, but farmers with only a common school education took about ten years to acquire a clear title to their lands. Indiana, Illinois, Iowa and Kansas had the same story to tell. In all these states, and whether in owner or tenant class, the better educated farmers were earning the higher incomes.

President Frank concludes from these discoveries that in farming as in other vocations, one's wagon had better be hitched to a star than a steer.

Beats Record for Size

Hen Lays Five Ounce Egg Containing Three Yolks

A dispatch from Revelstoke, B.C., states that a White Leghorn pullet, belonging to Mr. Graver, of that city, has laid an egg that beats all size records known in that part of the country. It measured 7 inches in circumference around the middle, and 9 inches over the ends; the longway of the oval, and weighed five ounces. When opened the egg was found to contain three full-sized yolks. An other remarkable feature of this hen's achievement lies in the fact that she has been laying eggs almost as large as this since she was five months old. She has never been known to lay an average-sized egg.

Radio Business Declines

The Dominion Bureau of Statistics reports production of radio sets, parts and batteries in Canada during 1926 valued at \$6,277,541, or almost a million dollars below the 1925 figure. Returns were received from 11 establishments in this field.

It Palestine two stone tablets have been dug up, which authorities say furnish proof of the captivity of the Jews in Egypt.

Some men told the truth and then try to lie out of it.

W. N. U. 1927

Canada's Telegraph Service

Number of Messages Handled Last Year Shows Big Increase

Dominion statistics recently issued show that more than 12,000,000 telegrams were sent out in Canada last year, over various lines, representing an increase over the preceding year of 162,401 telegrams, or 6.6 per cent. The Canadian National Company handled 5,538,295 messages, the Canadian Pacific Company, 5,162,551 messages, Western Union, 779,188; Dominion Government service, 522,796; Tenshaling and Northern Ontario, 130,719; North American Telegraph, 42,228; and Marconi Wireless, 23,334. No less than 2,701,000 messages were received in Canada from United States sources.

A total of 1,019,625 cables were sent from Canada last year and 5,402,405 cables were received. Money transmitted by wire increased in proportion, last year's total being \$7,730,127, or over a million dollars increase.

The report shows Ontario to have the greatest wire mileage with 109,202 miles; Saskatchewan, 37,951 miles, and Quebec 35,356 miles. The Canadian National has 1,922 offices in Canada and the Canadian Pacific 1,510 offices, and the Dominion Government service 1,066. The revenue brought into Canada by its wire services is about ten millions and a half.

A Fetching New Frock

Of smart individuality is this attractive frock. The flared skirt front is joined to the bodice, while the back is in one piece. View A has a becoming shaped collar and flared cuffs finishing the long dart fitted sleeves, and is trimmed with an Egyptian design at the front and on the belt. View B shows the same frock with the collar and cuffs omitted and the V-neck simply bound, while buttons adorn the front. View C is a contrasting material. No. 1570 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 1/2 yards 39-inch material, or 2 1/2 yards 54 inch, and 1/4 yard 36 inch contrasting material for vestee in View B. Price 20 cents the pattern.

Transfer Design No. 1190, Blue or Yellow, is used for trim View A. Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents per copy.

The Favorable Prospects

Good Year is Indicated For the Farmers of the West

Despite the delay in seeding caused by backward weather the Western crop outlook becomes more encouraging with the passing of time. A recent report from Winnipeg stated that the acreage sown to wheat this year was placed at 17,500,000, as compared with 21,000,000 acres last year, but that the harvest may equal the bumper crop taken in 1915 from 13,000,000 acres. The decline from 1926 in acreage is not all lost, however, as much of the land not put into wheat is being used for coarse grains.

Alberta has not suffered like the two other Prairie Provinces. So far, a record crop is being talked of there. Growth is proceeding normally in both Saskatchewan and Manitoba, and the reduced acreage is not causing unqualified dissatisfaction. The Saskatchewan Farmer points out that prevailing conditions will give the farmers an opportunity to put up a good fight this year against weeds, which are becoming an ever-greater problem, while there will be more summer-fallowing and intertillage than usual. Besides this, the excessive moisture has helped out the grass and provided badly needed forage for dairy cattle.

Apparently there is ample reason for looking forward to a good harvest from the West on the whole.—Toronto Globe.

Superior Pulpwood On Vancouver Island

Development in Paper Industry Small in Comparison With Resources

It is stated that two-thirds of the pulpwood of British Columbia—about 125 billion feet—is located on Vancouver Island and that it is of superior quality for paper making and very dense in stand. Moreover there is distributed over the island about 500,000 undeveloped horsepower or available energy in rivers and waterfalls awaiting harnessing to supply power for the pulp and paper mills of the future. Though 42 million dollars has been invested in the pulp and paper mills of British Columbia, this development is comparatively insignificant in comparison with the province's resources, and its unrivalled position for export to the western United States, Asia and Australia.

Will Take Aerial Photographs

For the first time since its inception as a game preserve, aerial photographs mapping out the wood buffalo preserve at Fort Smith are to be taken by the Topographical Survey. Two planes will reach Alberta shortly, and if flying and photographic conditions are satisfactory, the whole survey should be made within a month. With recent extensions this great natural park is now 17,000 square miles.

An Old Age Industry at St. Andrews

Old Frank Atwin's four score years do not hinder him from turning out some of the finest models of the Indian canoes made by the Indians of New Brunswick. This trail-hardened Malécite, photographed above, is holding a finished model of a canoe of which very little is known, being that of one of the sea-going vessels used by the Indians. In them they used to scout the shores of the Atlantic and according to old-timers some exceedingly daring trips were made.

St. Andrews-by-the-Sea where this Old Indian lives with many of his tribe members has an attachment of

Canada's Trade In Furs Has Been Reaching High Levels During the Past Few Years

Ploughing Under Peas As a Green Manure

Detrimental Effect is Noticed in Following Crop

The ploughing under of peas as a green manure has resulted in a significantly lowered yield of wheat the following season as compared with the bare fallow. The detrimental effect has also been quite apparent in the oat crop following the wheat. These results were obtained in a series of experiments covering 13 years, conducted at the Brandon, Manitoba, Experimental Farm. The yield of wheat following bare summer-fallow averaged 35 bushels per acre over 13 years against 34 bushels on land on which peas had been ploughed under in early July and 33 bushels where the peas had been ploughed under in late July. The difference in the case of the oats following the wheat was still more striking. The ploughing under of peas possibly increases to some extent the nitrogen content of the soil, but moisture is dissipated in producing the green manure crop. The experiments were made on a rich loamy clay soil and the results have emphasized the fact that moisture is a greater factor in increasing yields than fertility in a soil which is lacking in the essential ingredients of plant food. The results are even more definite when the cost of seed and the extra labor involved in preparing a seed-bed for the peas are taken into consideration.

Less Electrical Power For Domestic Use

Five Countries Are Ahead of U.S. in This Respect

For a country so highly developed in up-to-date methods, it is surprising to learn that the United States is relatively backward in the domestic use of electricity. Switzerland, Japan, Denmark, Canada and New Zealand, in the order named, are ahead of the United States in the proportion of homes wired for electricity. One factor that has a vital bearing on this situation is that many areas of the United States are lacking in water power necessary for the economic production of electric power. In that regard, Canada is singularly favored.

New Power Plant

The Carrot River Valley Mills, near Tisdale, Sask., are installing a new lighting and power plant. The milling plant, which has a capacity of 100 to 120 barrels a day, is also to be electrified. When plans are completed there will be available to private users, at special rates, 100 k.w.

Before the entry of the British into the fur trade of Canada, the chief centres were Lelpzig, Amsterdam, Paris and Vienna. The monopoly held by the Hudson's Bay Company and the commanding position it had won was such that the main current of the fur trade in America went to Great Britain; London became the leading fur market and so continued until recent years.

The Great War brought revolutionary changes in the fur trade among which was the establishment of powerful competing fur centres in Canada and the United States which diminished the sale of American pelts on the London and other European fur markets. St. Louis began to hold fur auctions in the year 1915, but these were discontinued in 1924. New York fur auctions commenced in 1916 and those of Montreal in 1920, attracting buyers from all parts of the world. The combined value of the pelts sold at these three fur auctions totalled many millions of dollars each year which is not greatly lessened by the discontinuance of St. Louis. Western Canada has also shown considerable enterprise, Winnipeg, Edmonton and Vancouver having established fur auctions. A development affecting the Canadian commerce in furs in the provision made by the Provincial Government of Alberta through its Game Branch to enable farmer-trappers and others to dispose of their furs.

Canada's external trade in furs has very materially increased in recent years. Exports have risen from \$5,668,000 in 1914 to \$17,422,440 in 1926 and imports from \$2,755,000 to \$7,528,532. The capital investment is valued at about \$10,000,000. The number of fur skins treated is over 4 millions and commerce in furs has shown a marked increase in America especially in the last 20 years. Today the pelts of practically every fur bearer is being utilized.

A number of important problems have been met and to a large degree solved in the past few years by the Fur Industry, but it has not, according to the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, finally solved the vital factor of the future of the fur supply. That is mainly an economic problem and requires the full co-operation of the various interests affected. Among the contributing causes which have been a menace to wild life, might be mentioned the predatory birds and animals, laxity of protective laws and scarcity of legal protective sanctuaries where natural breeding may go on undisturbed, the advance of civilization through the development of agriculture, mining and the wood products industries, and the forest fires which ravage and destroy the fur bearers' natural home.

Reindeer Farming Is Being Investigated

Danish Experts Studying Possibilities in Barren Lands of Northwest

The founding of a reindeer industry in barren lands of the northwest territory is being delayed by the federal department of interior pending completion of an investigation by two Danish experts from Greenland.

The department has received an application from a British Columbia syndicate for permission to start a reindeer farm on the barren lands. However, there is considerable uncertainty as to the food resources available, and, until this is decided, the application will be suspended. The investigation is being conducted by Ponslid Brothers, who entered the barren lands early in 1926 and are expected back this autumn. If their report is favorable the department will encourage the founding of the industry, and probably will start a government farm, bringing over a boat load of reindeer from Norway.

Lifting machines, constructed much like the modern elevator, with pulling ropes and winding drums, were used as early as 236 B.C.

"You look like a sensible girl, let's get married."

Ser—"Nothing doing. I'm just as sensible as I look."

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER II.—Continued

Anna dreamed pleasantly of the golden age of which the street corner leaders told, when there would be leisure and luxuries for the workers and confusion for the capitalists; when railways and street cars and theatres and all the sources of pleasure would be free as air; and the some, disagreeable drudgery would be gone for ever.

Indeed, for Anna the golden age was already here. Some one would get her her breakfast tomorrow morning; someone would have to make this little stinky, stringy bed if you call it a bed. That was something, too. Instead of attending to other people and carrying trays and washing dirty dishes, someone was going to do it for her, hooray!

So Anna sat on her narrow bed, a prisoner before the law, but not cast down or desolate. She, too, had her own little painted fire, and she had not yet found out that there was no heat in it.

CHAPTER III.

Meanwhile, Helmi washed the gold-clover ironstone dishes at the Yage Hotel, made beds and carried trays and learned new words every day. English language in Helmi's hands became a simple thing. She took no account of its idioms. She did not see why the man who brought the bread should not be called the "loaf-er," or why if the cat licked up its milk Mrs. Spencer would mind if she said in answer to a phone call "Mrs. Spencer is out licking up cat!" It was rather bewildering; and how was Helmi to know that the meter man had to do with the electric light she thought he must be the butcher?

Helmi's outbursts of temper gave Miss Kenny some concern. The first one was directed against Martha Draper, the bow-legged English girl who washed dishes, and to whom Helmi was now assistant.

Martha had washed dishes in her own untidy way all her life, no one taking notice of her methods. The cook, concerned with roasts and pies and such important things, could not very well clutter her mind with the

details of dish-washing. Martha at ways had the dishes ready for the next meal, and that was about all that mattered.

Martha believed in purification by fire as well as by water, so she frequently left the potato pot to burn on the stove until the burning smell caused someone to investigate. Helmi had many times shown her the better way, to which Martha had given but scant and scornful attention. Martha had the British tradition foreigners were dirty and ignorant, and certainly "could tell her nothink."

Martha washed dishes by piling them into the sink without scraping them, turning on the hot water when she was ready, and subsequently rescuing the unhappy cups, saucers and plates from the seething and unlovely flood. Helmi broke into a storm of Finnish rage when she saw it, and let the water run away prior to cleaning out the sink. Then she scraped the dishes until even the clover leaves were in peril, set them in neat piles on the table; scoured the sink, and proceeded to show the lady who had been born within the sound of Bow bells how dishes should be washed. Martha watched in cold and stiffening silence. She hated dish-washing anyway, and saw nothing in it but a means whereby she could earn money to buy herself some swell clothes. Martha had a "sweetie"—a night watchman at the Parliament Buildings and she believed he meant business. Martha's way of breaking the news of her approaching nuptials was, "I wouldn't be surprised if we saw the fish of the whole business this summer."

When the next meal was over the dishes arrived as usual on the kitchen table in their great irregular, dizzy piles, slippery with gravy, pickles and meat. Martha proceeded to insult the sink again (which Helmi had polished into a state of whiteness it had not enjoyed for years) with the presence of the dishes and their unused contents. Helmi was serving the dessert for the evening meal and did not see what had happened until Martha had the sink dripping with dishes.

When she saw what had happened she stood quite still, a black rage gathering in her eyes. With the empty tray in her hand she awaited the coming Martha, who came gaily singing into the kitchen with another toppling load of dishes. Helmi waited until she had deposited them on the table, then brought her empty tray down on Martha's head with a metallic crash. Martha screamed in genuine terror and Maggie Kenny and Mrs. Spencer came running in.

Helmi pointed to the littered sink and tried to explain. Martha metaphorically wrapped the British flag around her injured person and called for justice. It was one of those easy cases where the evidence is all in plain sight.

It was Mrs. Spencer who made the abstract of the case.

"Ain't that just like a Finn, Maggie. Well, if she wasn't a tidy girl she clean and neat, but high tempered? wouldn't have done it. Martha, shut up or I'll give you something to baw! for; you're not hurt as bad as all that. Helmi shouldn't have clouted you with the tray. Do you hear, Helmi? Now, Martha, you can get off for the night; Helmi will do the dishes alone. And I've a sort of notion she doesn't mind that a bit, so every one is satisfied. And it may be that Martha now knows it's a dangerous thing to be too messy with dishes when Helmi's around, anyway."

Helmi lost no opportunity of learning English, and counted the day lost if she had not added a few words to her vocabulary. She used the wrap-ping-paper which came into kitchen

on parcels for the purpose of keeping her lists, tearing it into squares and sewing them together with twine. Martha, who after the unpleasant event just recorded became a better dish-washer and a more agreeable companion, taught Helmi to say the words, resulting in her acquiring a cockney accent which the boarders found very amusing.

Helmi's love for the open took her out when her spare days came. One afternoon a week was hers and every second Sunday. Martha would not come with her even if they had been able to get off together for she often said she hated the country and liked to see a bit of life when she got out. At home, she always went to see the Guards change at the palace gates, "but why any one would walk out in to the country to watch cows eatin' grass" was more than Miss Draper could make out; "but," Miss Draper generously hastened to add, "it takes all kinds." Miss Draper, however, could see some sense in going to see the dresses in the shop windows and picking out which one you would get if you had a king's ransom.

Helmi had now been in the hotel four months. She had acquired enough English to take orders in the dining room.

"Will you have 'am or beon with your heggis?"

"Peach pie, happle pie or tabio car?"

She often wondered why she was asked to repeat her orders, and why the boarders laughed, but it was all in the day's work to Helmi.

Helmi's great delight was to get out of the city on her Sunday afternoons, where there were no sidewalks, no pavements, no street cars and few people.

One day she determined to walk far enough to leave all the houses behind. Maybe she would find green grass, or a turnip field, or cows grazing in a meadow, or meet a friendly dog who did not know she was a foreigner. She soon reached the place where the sidewalk ended, and felt once more the good soft earth beneath her feet. It was familiar, home-like, her own. It spoke to her in her own language, it was not laughing at her. If she sowed a seed in it a little plant would come; even if she did not know its English name it would come just the same, and Helmi's heart grew warm with the thought.

The sky hung low that day, seeming to Helmi like a great glass cover over the earth, like the dome of glass that Mrs. Spencer had in the upstairs parlor over her seed-wreath. She lay down on a green slope to look into the sky. It was so like the sky at home it made her feel not so far away after all. Even if words were so different, skies and grass and the ground were the same, and soon she would know how to call them. Aunt Lili, like her, had not known a word of English when she came out.

It was lovely to be away where it was quiet and green and all by herself. It did not matter if one could not speak English here; the sky and the grass and the little creek on whose bank she sat knew no English either. A fringed blue gentian growing in the grass peeped shyly at her as she peered about her. She called it by its Finnish name and wondered if it had ever heard it here.

(To Be Continued.)

The British Medical Association, which has been trying to establish a standard by which drunkenness can be judged, has given up the task as impossible.

Mothers Should Use

When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, dysentery, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

May Decipher Strange Language

Professor is Working on Key to Baffling Characters

The key to the baffling characters of a strange half-Semitic half-Egyptian language which flourished nearly 3,000 years ago and which science has never been able to decipher may rest today with Prof. Kirsopp Lake, head of the Harvard-Michigan expedition to Mt. Sinai, Arabia.

A terse message from Prof. Lake to The Boston Herald reports new found fragments of the mysterious "Sinai Inscriptions," which Harvard University authorities said might throw on entirely new light on Moses and biblical history.

The Sinai inscriptions were first found on the mountain where Moses received the tablets of the law but have never been satisfactorily read although authorities never have ceased to seek their solution.

If Prof. Lake's "fragments" fit into the existing gaps it was possible, archaeologists here said, that they might not only remake history but reveal a new origin of modern languages.

The inscriptions were discovered in 1904 during the excavation of the temple of the Egyptian goddess, Hathor, on the side of Mount Sinai. They were carved on stone tablets and fragments unearthed among ruins of the temple and were in a language never before encountered by excavators, according to Dr. Henry Pfeiffer, Ph.D., instructor in Semitic languages at Harvard.

The characters, he said, were strangely allied to Egyptian hieroglyphs and the later Semitic alphabet, yet were not identical with either.

Nickel Being Largely Used

Long Period of Prosperity Seen for This Canadian Industry

When nickel deposits were discovered in Sudbury, Ont., district back in 1886, the impenetrability of the metal proven and the governments of various nations convinced of its high merits for purpose of armaments, the company faced a long period of prosperity. This was the first phase, and the chief interests of investors today is that up to the end of 1926 some \$77,000,000 had been paid in dividends and the company had built up a net working capital account of \$15,531,000.

The second and much more important phase is the result of the company's invasion of commercial markets, and already production tonnage has attained proportions equal to the best war year. Previously, uses for nickel were comparatively limited; now its uses are becoming general. It has been said that the motor car has supplanted the battleship, but this is only a small part of the story, because nickel is being utilized in more than a hundred products in the factory, shop, laboratory and home.

Conscience Troubled Her

Customs officer McDonald at Newgate has received a letter from a lady living in a Saskatchewan village enclosing 50 cents with the explanation that last summer she failed to declare a cheap new dress she had purchased across the line. As she was a Christian and wanted to do what was right, she enclosed the money as duty.

Little Helps For This Week

Though He be not far from every one of us.—Acts xvii. 27.

Then my heart said, "Give over, Question no more, no more; The wind, the storm, the wild hermit-flower,

The illuminated air; The pleasure after prayer; Proclaim the unobscured Power; The mystery that hides Him here and there; Bears the sure witness He is every-where."

—Alice Cary

If you wish to behold God, you may see Him in every object around; search in your breast, and you will find Him there. And if you do not yet perceive where He dwells confute me if you can, and say where He is not.

—Metastasio

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water. They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Because of the inequality of their strides lost persons invariably walk in circles; a straight course is impossible to anyone without guiding landmarks.

Wretched from Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily vigor and mental happiness.

The Corinth Canal was started by Nero about 2,000 years ago. The project was abandoned and finally completed in 1893.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Expeller is an excellent medicine to destroy worms.

The largest passenger steamship in the world, for use on inland waters, is 559 feet long, and was recently launched on the Great Lakes.

A BROKEN DOWN SYSTEM. This is a condition for disease to which doctors give many names, but which few of them really understand. It is simply weakness abroad, as it were, of the vital force that sustains the system. No matter what may be the cause they are almost numberless; its symptoms are much the same, the more prominent being sleeplessness, sense of prostration or weakness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what alone is absolutely essential to all such cases is increased vitality—vigor, vital strength and energy to throw off these morbid feelings; and as night succeeds the day this may be more certainly achieved by a course of

THE NEW FRENCH REMEDY, THERAPION No. 3 taken by any other known combination. So easy as it is taken in accordance with the directions accompanying it, will the shattered health be restored and the expiring lamp of life lighted up afresh.

and a new existence imparted in place of what had so lately seemed worn out, used up and valueless. This wonderful medicine is available at all drug stores and conditions, in either sea, and it is difficult to imagine a disease or derangement whose main factor is weakness, that will not be speedily and permanently overcome by this recuperative essence, which is destined to restore to health everything that had perished. For this wide spread & numerous class of human ailments, sold by leading chemists, or direct by return mail from The French Remedy Co., Montreal, P. Q., Canada.

AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Colborne, Ontario.—"When I was first married I was very thin and weak. The doctor said I was weak and would never be able to have a child, but I did, and from the time my baby came I suffered all the time and doctored and took medicine. Life became a burden, and doctors said an operation could help me, but my husband was opposed to that. I had seen Lydia E. Pinkham's medicine advertised, so I told my husband that I thought I would try it, that I might get some relief. I had not taken one bottle when I could feel it helping me. I took five bottles and had better health. Now I have three girls and a boy and have done my work up to confinement. I am now at the Change of Life and owe my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle when I think I need it."

—Mrs. SUSAN DAYMAN, R. R. No. 5, Colborne, Ontario.

Mr. and Mrs. Greenan and fa-
mily are spending a holiday in
Banff.

MELOTTE
CREAM SEPARATORS

GET ALL THE CREAM

Square Cut
Gears
last longer

than bevel
gears on
any machine

In addition to the profit-making service of "Melotte" there is a pleasure
in operating this World's Greatest Cream Saver that also saves ninety
per cent on the drudgery of the dairy farm.

**Trade in Your Old Machine for a
New Melotte**

We will make you a splendid allowance on the deal, give you a machine
that will deliver the last particle of butter fat there is in the milk and the
most generous payment terms.

A FREE TRIAL ON YOUR OWN FARM

Don't buy a Separator till you've obtained our illustrated catalogue and
full particulars of "Melotte."

**Built for
Endurance**

BEHIND the beauty of Chevrolet there is
an abundance of strength and stamina,
just as there is a great store of surplus power.
The rugged channel steel frame, the husky
banjo-type rear axle, the powerful valve-in-
head engine and every detail of construction
combine to defy the ravages of wear and
tear, of hills and ruts, of mud and sand, of
extremes of climate and of hard, continuous
usage.
As Chevrolet has been designed for beauty,
powered for performance, planned for
economy—so Chevrolet has been BUILT
FOR ENDURANCE.
And this—the most Beautiful, the most
Powerful and the most Rugged Chevrolet in

Chevrolet History—is selling at new, low
prices, the lowest for which Chevrolet has
ever been sold in Canada.

Roadster	\$655	Touring	\$655
